- Zustand
- Victory Native
- Ramda

Fenice Care Mobile App

- Developed a user-friendly React Native app for real-time monitoring of solar plant performance, **servicing 500+ active users**.
- Minimized customer support interactions** with detailed plant insights in the app itself.
- Managed the entire app development **lifecycle from conceptualization to deployment**.

Tech Stack:

- React Native
- Typescript
- React Query
- Redux
- Ramda
- React Native Paper
- Victory Native

Flow Platform

- Architected and implemented the entire UI of a Web-App, **optimizing team operations and performance, improving TAT by 40%**
- Currently utilized by a **team of 30+ handling over 500+ tickets daily**.

Tech Stack:

- React
- Typescript
- Sass
- Ramda
- React Pdf
- Pusherjs
- Vite
- AntDesign
- react-router
- react-jsonschema-form

Front-end Engineer

Reqip

Jul,2021 - Mar,2022

Achievements

- Collaborated on software architecture and UI, enhancing **team efficiency and delivering key features**.
- Implemented features like payment automation and report generation using React PDF, boosting internal team efficiency.

Tech Stack:

- React Native
- Typescript
- React Query
- Zustand
- Victory Native
- Ramda

Full-Stack Web Developer Intern

Yamm Labs

May,2020 - July,2020

Achievements

- Built and deployed a WordPress website with Mailchimp integration, and e-commerce store as an intern.

Tech Stack:

- HTML
- CSS
- JS
- Wordpress
- Mailchimp
- WooCommerce
- ThemeForest

Skills

Front End

- SPA & Architecture
- JavaScript
- TypeScript
- SASS

Frameworks

- ReactJS
- React Native
- NextJS
- BlueprintJS
- AntDesign

Back End

- NodeJS, ExpressJS
- MySQL, Postgres
- MongoDB

SDLC

- Git
- AWS
- Zeplin

Side Projects

Happiful Revamp

- Successfully developed and deployed Happiful.com using **JAM Stack**
- Boosted **user engagement and traffic by 20%**
- Improved site speed and overall user experience.**

Tech Stack:

- NextJs
- TypeScript
- Tailwind CSS
- HeadlessUI
- Algolia
- Ghost CMS
- Contentful
- Google Maps
- Formik

Spotify Clone

- Developed the clone of Spotify using **NextJs** and other cutting edge technologies
- Leveraged **Supabase** for backend functionalities, showcasing expertise in integrating and managing data in a cloud-based environment

Tech Stack:

- NextJs
- TypeScript
- Tailwind CSS
- RadixUI
- Supabase
- Postgres
- Zustand

Education

B.tech (Electronics and Communication)

The NorthCap University
